EXPERIENCE

ELEVATE A/B

Front-End Developer | Jan 2023 - Present

- Worked on a web application serving over 2,000 high-revenue e-commerce stores, facilitating sophisticated A/B testing on their storefronts
- Developed an analytics dashboard in React that provided merchants with key data insights, directly aiding in achieving a \$10M+ revenue increase across stores through informed storefront improvements
- Led the front-end development of an automated reporting feature, allowing merchants to receive timely insights on A/B test outcomes, thereby streamlining decision-making processes

PROJECTS

SNAPSITE

bit.ly/45OxuXe

- Developed a modern responsive tech site with multiple pages displaying product features
- Built using React and Next.js taking advantage of SSR static blog posts and pages

SHOPPEUR

bit.ly/2O0Tvjc

- Created a modern responsive eCommerce website using React and Next.js that displays products by categories
- Integrated a functional cart, product search and checkout features with images served from a CDN
